MEMORANDUM FOR SEE DISTRIBUTION

FROM: JTIDS Class 2M Product Support IPT Co-Chairs

SUBJECT: JTIDS Class 2M Product Support IPT Meeting #3 [23 July 1996]  
Minutes

1. The Product Support Integrated Product Team (PS IPT) Meeting #3 was held at the Pentagon on 23 July 1996 in 1E801, Conference Room 4.
2. Maj R. Nunley (ESC/TG-4) opened the meeting by welcoming the attendees and having them introduce themselves. Maj R. Nunley stated the purpose of the meeting was to review the status of the Working Groups (WG) and to discuss open issues.
3. LTC P. Short (PM-TRCS) briefed the Test Coordination WG. LTC Short updated the group that the 2M ORD had been signed on 15 July and discussed the coordination cycle for the COICs, the Army Annex [annex to the JTIDS Joint Test Evaluation Master Plan] and the Test Evaluation Plan (TEP). Once the COICs are approved, the Army Annex will be coordinated through Army and submitted to DOT&E and DTSE&E for signature. The TEP will follow the same coordination and signature process after the Army Annex is approved. LTC Short took an action to contact the test community and provide dates the Army Annex and TEP need to meet to support operational testing (PS IPT-AI-004).
4. LTC Short then briefed the test schedule and the test report generation timeline. He stated the four principles the test community was operating under for the JTIDS Class 2M developmental testing (DT) and operational testing (OT) were: (1) shared data, (2) no duplication of efforts, (3) testing in parallel, and (4) expeditiously writing the reports.
5. Mr. J. Myslinski (PM TRCS) provided an update to the Cost WG. The CARD is anticipated to be complete the end of July pending the inputs from the acquisition strategy and risk assessment and that the Service Cost Position (SCP) is planned to be approved by Dec 96. A schedule for the Cost WG events will be released following the next Cost WG meeting, anticipated in early August.
6. Mr. Myslinski indicated the Cost WG will pursue a paper OSD CAIG Independent Cost Estimate (ICE) review. Although a formal request has not been submitted to

OSD, the updated 5000 series states only one OSD ICE is required and JTIDS Class 2M had an OSD ICE for the Low Rate Initial Production (LRIP) decision.

7. Mr. Myslinski discussed the methodology the Cost WG will use. Actuals from GEC will be collected from a plant visit in middle to late August. The timeline for the operation and support (O&S) methodology was requested [the O&S is based on the maintenance concept]. This request was captured in Action Item PS IPT-AI-005.
8. Capt J. Laub (ESC/TG-4) briefed the Acquisition Strategy WG. The Army's Link 16 procurement strategy was presented followed by the maintenance concept. A discussion followed about the different alternatives and options that were available. Mr. Myslinski took an action for the Maintenance Cost Benefit analysis to be available by 30 September (PS IPT-AI-005). Capt Laub then presented the Acquisition Strategy [due to the sensitive nature of this information it will not be included with these minutes. Please contact Capt Laub if you have questions].
9. Maj Nunley stated that the second draft of the JTIDS Class 2M Single Acquisition Management Plan (SAMP) will be released the week of 22 - 26 July. He acknowledged that all areas are not yet complete but asked the PS IPT members to provide their comments by the end of August to assist the iterative and continuous development of the SAMP.
10. Maj Nunley addressed the open issues for PS IPT. OSD strongly desires to have an AF E-3 Airborne Warning and Control System (AWACS) aircraft participate in the Army OT. LTC Short stated the Army and AF JTIDS test community will attempt to make this happen given the schedule and cost constraints. Maj Nunley took an action to provide a date that a decision must be made on whether or not the E-3 AWACS will participate in the Army OT (PS IPT-AI-006).
11. The question of which organization - the Army or BMDO - will buy-back the initial JTIDS Class 2M spares from CECOM was discussed. LTC Short stated that a letter addressing this issue is being reviewed by the Army and will be forwarded to BMDO. Maj Nunley indicated this issue needs to be resolved prior to the JTIDS Class 2M Acquisition Strategy Panel (ASP). Mr. Myslinski took an action to have this completed by 30 August (PS IPT-AI-007).
12. LTC K. Kraus (J8 ATD) stated there is a very low probability for a paper JROC and the JTIDS 2M program should plan for a full JROC [closes PWG-AI-002]. LTC Kraus also stated that a JROC Readiness Board (JRB) needs to occur 1 week prior to the JROC and that a pre-JROC briefing needs to occur 2 weeks prior to the JROC.

13. The following Action Items were recorded:

<u>Action Item</u>	<u>OPR</u>	<u>Due Date</u>	<u>Tracking #</u>
Provide dates the Army Annex and TEP approvals are needed to support operational testing	LTC P. Short PM TRCS	23 August 96	PS IPT-AI-004
Army Maintenance Cost Benefit analysis to be available	Mr. J. Myslinski PM TRCS	30 September 96	PS IPT-AI-005
Provide a date that a decision must be made on whether or not the E-3 AWACS will participate in the Army OT	Maj Nunley ESC/TG-4	16 August 96	PS IPT-AI-006
Resolve which organization - the Army or BMDO - will buy-back the initial JTIDS Class 2M spares from CECOM	Mr. J. Myslinski PM TRCS	30 August 96	PS IPT-AI-007

The next PS IPT meeting has not been scheduled.
